Hello, my name is Bartosz Czapiewski.

I am the founder of the **Excel BI Academy** which is a school of reporting and data visualization in which I would like to learn myself. In my daily work I help analysts create reports **faster and communicate data in an easier way.** The result?

In many companies, the Academy graduates have **saved hundreds of hours of work** and **improved reporting quality** and, consequently, decisions.
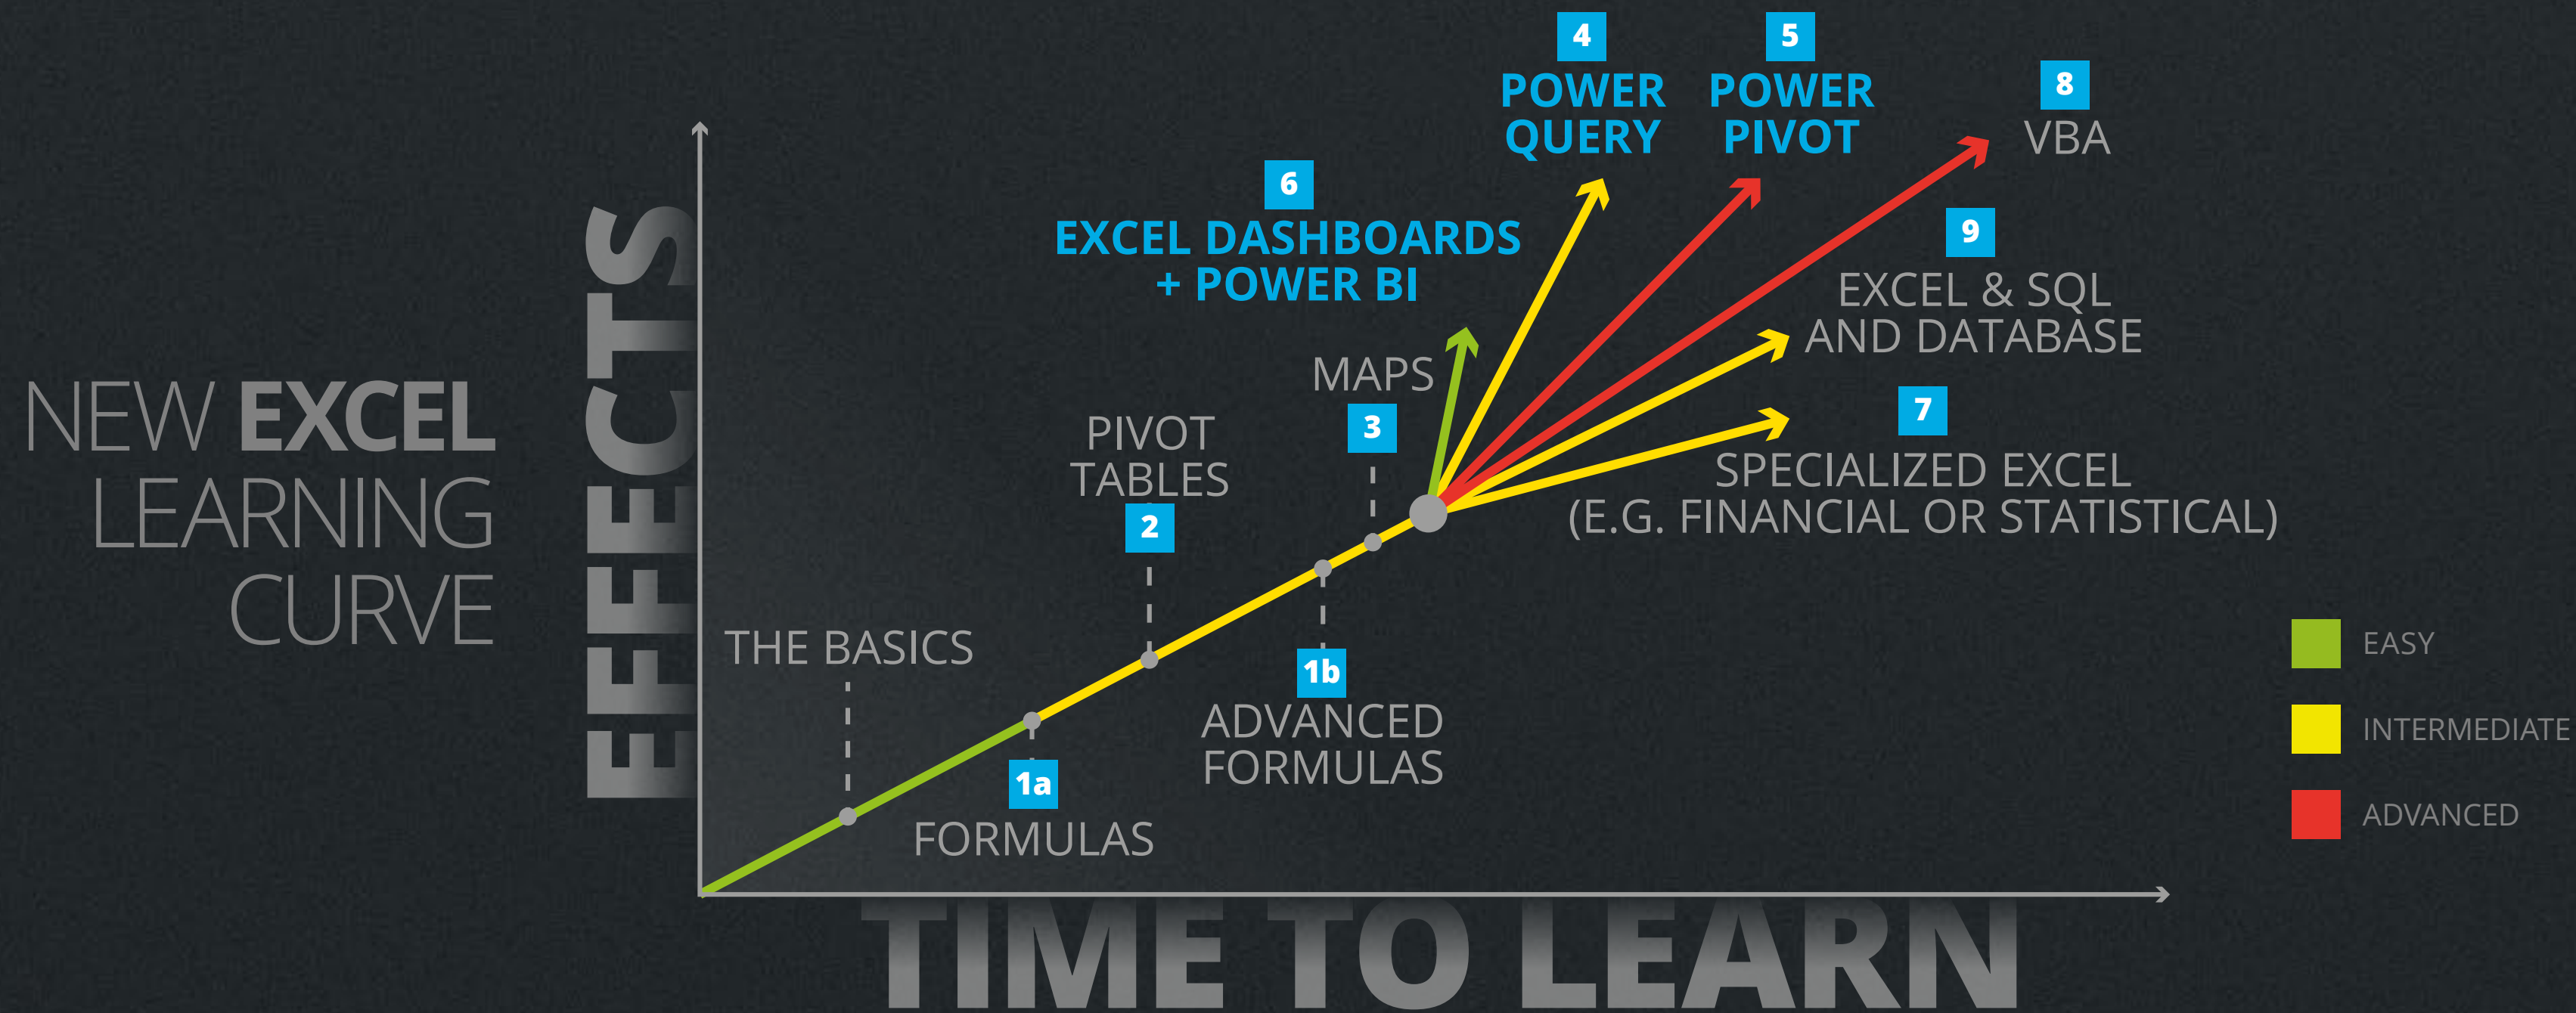

People who follow me through the full process of learning which I call the **New Excel Learning Curve**, are **quickly gaining recognition for their work** and **are beginning to revolutionise their organisations**.

How is that possible?

POWER revolution in EXCEL

Power add-ins are quite new and many Excel users are not really familiar with them. While learning Excel, an analyst learns formulas and pivot tables first. What's next?

NEW **EXCEL** LEARNING CURVE

EXCEL BI ACADEMY
by Bartosz Czapiewski

FOR AN INTERMEDIATE EXCEL USER, I RECOMMEND THE FOLLOWING PATH:

EXCEL BI ACADEMY
by Bartosz Czapiewski

| Connect to Data | Transform Data | Build Data Model | Define Measures | Design Report | Publish Report |

Query Editor
Power Query

Data Model
Power Pivot

Data Visualization
Excel / Power BI

Understanding Power components allows Excel and Power Bi users to:

- ✓ Automate work
- ✓ Save time
- ✓ Improve data quality
- ✓ Improve report design and their interactiveness
- ✓ Improve decision quality

The best package of courses

Permanent 24/7 access to video courses from any device.

Practical nature of the courses – only exercises – based on the experiences of hundreds of participants in our training courses.
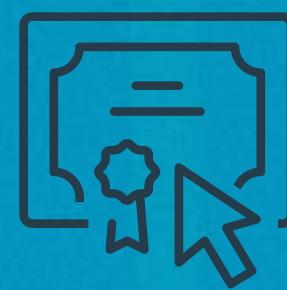

The ability to ask questions on an on-going basis.

Access to videos even after completing a course (isn't that what we all dream about?).

Certification process, confirming the acquired skills.

Constantly updated material scope (along with changes in tools).

✔ **in English**   ✔ **conducted by one trainer**

30-day MONEY REFUND GUARANTEE 100%
